

Powering the Cisco Nexus 7000 series?

There's a smarter, more economical solution to power the Cisco Nexus 7000 series. Server Technology introduces the unique 50/60A 3-phase Smart Cabinet PDU designed especially for Cisco Nexus 7000s. Sentry CS-6HD/HY products provide a NEMA locking outlet solution for high density applications found in network cabinets. These CDUs provide reliable 3-phase power distribution combined with local and remote power monitoring and environmental monitoring capabilities over IP.

Cisco Nexus 7000 7.5kW Power Supply Solutions

New 50/60A 3-phase CDU with Locking Outlets

A more economical way to power Nexus 7000 Chassis. You can lower your infrastructure costs.

- Fewer power whips and breaker positions needed from the Remote Power Panel (RPP) means lower equipment costs.

The information you need. At a glance.

-Your can use the network interface to view power, temperature and humidity levels via a Web browser.

- Digital True RMS current monitoring is provided and critical to preventing overloads in high-density computing environments.
