

IDEAL FOR VARIOUS HIGH PERFORMING SYSTEMS

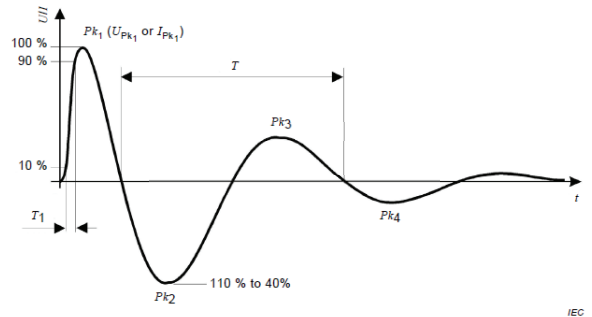

INTEGRITY STEALTH POWER CONDITIONER

NXT Power provides the absolute best possible protection from surges, noise and even lightning strikes. Integrity Standard power conditioners protect sensitive electronic equipment from hardware damage and prevent operational disruption due to common power problems.

ELEVATE YOUR POWER QUALITY GAME

The Integrity Stealth power conditioner combines surge diversion with a highly effective low-impedance isolation transformer and noise filtering to bring you the cleanest and most conditioned power available. This device allows fewer than 10 volts to pass through the device in normal mode and less than 0.5 volts neutral-to-ground when tested To ANSI/IEEE C62.41, category A & B.

Extremely low output impedance and the integration of NXT GROUND makes it ideal for high performing systems. With NXT Ground, it reduces the necessity for both dedicated electrical circuits and isolated ground wiring.

ANSI/IEEE C62.41 SWITCHING SURGES - RINGING/OSCILLATORY

SPECIFICATIONS

MODEL #	INPUT VOLTAGE AC~	OUTPUT VOLTAGE AC~	MAXIMUM LOAD RATING (AMPS)	MAXIMUM POWER (VA)	FREQUENCY (HZ)	CASE SIZE (IN)	SHIP WEIGHT (LBS)
NPT180-GW-NF	120	120	1.5	180	60	6.58 x 7.21 x 1.60	7

SUPERIOR POWER PROTECTION BENEFITS & FEATURES

- Help your customers protect their electronic systems and ensure uptime all day, every day.
- Enjoy peace of mind knowing equipment is protected from problems due to common-mode voltage, spikes and transients, and more.
- Let through voltage is less than 10 volts normal mode and less than 0.5 volts neutral-to-ground when tested to ANSI/IEEE C62.41, category A&B.
- NXT GROUND provides networked systems with benefits beyond traditional power conditioners by eliminating ground loops that cause system lock ups.
